After touching briefly on the particu-lar judgment of the sinner immediate ly after death, and, at somewhat great-er length, on the general judgment of all men at the end of the world, he took up the solemn subject of "Eternal Hell," which awalts the obstinate sinner in the future world. ARE WORKING O.K.

According to those who are familiar with the operation of voting machines there is no truth in the statemen that there is a defect in the machine which prevents casting a vote for two different legislative candidates whose names appear one number the which appeared in these columns last evening that in case a vote was cast for one candidate the machine would automatically lock against the candidate just opposite on another ticket.

Although this is true in the instances where only one candidate is to be voted for it is not true in the case of the legislative candidates, where there are four on each ticket. Although the machine is so constructed that it will not be possible to vote for more than four legislative condidates, yet the voter's choice may be distributed throughout the three tic-

date whose name appears directly un-der that of the first Republican candidate and finally vete the first Socialist candidate directly under the falist candidate directly under the first other two. In other words the machine does not automatically lock on the legislative candidates until the voter has cast a ballot for four candidates, regardless of what their party

affiliations may be. Get your Union Pacific and Oregon at both the Republican and Democratic headquarters and any person who is not familiar with the opera-
